

Sweepers

1050 / 1020

Features

1050

- Huge hopper capacity
- Large sweeping path
- SLS (Self Levelling System) automatic main brush pressure control
- Dust micro filtration
- Adjustable side brush rpm
- Dust flap for large debris collection
- Main brush and dust filter replacement without tools
- Self cleaning filter system

1020

- Huge hopper capacity
- Large sweeping path
- Main brush pressure adjustment
- Dust flap for large debris collection
- Easy to use control panel
- Pleated micro-fine polyester filter
- Great visibility whilst working
- Hand assisted low dump discharge system
- Dust filter replacement without tools
- Maximum protection against impacts

Pre-programmed working settings. 3 independent programs allow best settings for all types of applications (1050).

Light weight high density polypropylene hopper complete with handles and wheels for easy transportation and dumping.

Micro-fine polyester filter (1020).
