

Sweepers

161 / 191

Features

- Large sweeping path
- Extensive filtering surface
- SLS (Self Levelling System) automatic main brush pressure control
- Pleated micro-fine polyester filter
- Effective filter shaking system
- Hydraulic power steering
- Closed hydraulic circuits on both traction and sweeping system
- Special enlarged easy to clean radiator
- Debris flap in stainless steel
- Extra-strong components for outdoor use

Hydraulic piston connected to the rear guide wheel.

Optional side brush cover for use in very dusty areas.

The machine is equipped with large elements separated by polyester fabric for maximum dust filtration capacity.
